Authorization service affected by deprecation of client adapters

Update : Conformance test automated run environment

- OIDC OP for Logout Profiles conformance test support

- Passed Conformance Tests per Keycloak version

Proposal : Extend FAPI-SIG's scope

PROPOSED DRAFT

Authorization service affected by deprecation of client adapters

How non-standard features would be treated after deprecating client adapters?

https://github.com/keycloak/kc-sig-fapi/blob/main/FAPI-SIG/meetings/34th/34th_MTG_Minute.txt

→ At least, authorization services (not UMA compliant) would be supported.

Authorization services and adapter deprecation

https://github.com/keycloak/keycloak/discussions/11681

Update : Conformance test automated run environment

OIDC OP for Logout Profiles conformance test support

● OpenID Providers for Logout Profiles (RP-Initiated OP, Session OP, Front-Channel OP, Back-Channel OP) conformance test automated run environment has been supported in FAPI-SIG's repository.

[Automated]

• RP-Initiated OP

• Back-Channel OP

[Manual]

• Session OP

• Front-Channel OP

Passed Conformance Tests per Keycloak version

Listed up which version of keycloak could pass which types of conformance tests:

https://github.com/keycloak/kc-sig-fapi#passed-conformance-tests-per-keycloak-version

This list would be updated whenever new version of keycloak is released.

Proposal : Extend FAPI-SIG's scope

Proposal : Extend FAPI-SIG's scope

How about working on features not directly relevant to FAPI in FAPI-SIG?

E.g.

Security

   OAuth 2.1 (Internet Draft), OAuth 2.0 for Native Apps (RFC 8252)

   OAuth 2.0 for Browser-Based Apps (Internet Draft)

 Preparation for existing algorithms being compromised

   Edwards-Curve Digital Signature Algorithm (EdDSA) (RFC 8032)

     Ed25519 : 128-bit security level Curve25519

     Ed448   : 224-bit security level Curve448

Privacy

  End to End Encryption - Access Token Encryption

END
