Table of Contents

Update : Conformance test automated run environment

 - Australia CDR (Based on FAPI 1 Advanced Final) conformance test support

 - OIDC OP for Logout Profiles conformance test support

PROPOSED DRAFT

Update : Conformance test automated run environment

Australia CDR conformance test support

● FAPI-SIG'S conformance test automated run environment has supported the Australia CDR (AU-CDR Adv. OP w/ Private Key, AU-CDR Adv. OP w/ Private Key, PAR).

https://github.com/keycloak/kc-sig-fapi#run-specified-fapi-conformance-test

OIDC OP for Logout Profiles conformance test support

- As for OpenID Providers for Logout Profiles (RP-Initiated OP, Session OP, Front-Channel OP, Back-Channel OP), it seems that keycloak does not support them.

  Can next Keycloak 18 support logout profiles???

END
